

The new embedded PC from Elektrosil for the latest Sharp monitor family offers high performance and maximum reliability made in Germany. It combines long-term availability (min. 5 years) and 24/7 operating mode. Current industry standards like recovery BIOS, desk update, multi boot, HDD password and Watchdog are implemented.

Thanks to its small footprint it fits perfectly on the backside of the PN-monitor.

The PC can easily manage videos up to full HD resolution; its high performance provides numerous capabilities for demanding applications, like e. g. for kiosk systems or digital signage.

## TECHNICAL SPECIFICATIONS

- Industry quality mainboard – made in Germany
  - 24/7 operation mode
  - AMD Mobile AthlonX2 Neo L325 (TDP = 18 W)
  - AMD M690E/SB600 Chipset
  - 2GB DDR2 800MHz SDRAM
  - ATI Radeon X1250 graphics onboard
  - ALC262 audio codec (Stereo)
  - Dual GigaBit LAN-Controller
  - 160 GB SATA-HDD
  - External power supply
  - Aluminium chassis
- | INPUT/OUTPUT              |
|---------------------------|
| • 2x PS/2                 |
| • DVI/I                   |
| • RS232                   |
| • 2x LAN                  |
| • 4x USB 2.0              |
| • Audio In/Out (analogue) |
